Objective

Dynamic and innovative Principal Engineer & Architect with extensive experience in leading software development projects from concept to deployment. Proven track record of driving performance improvements and implementing robust, scalable solutions. Adept at building and mentoring high-performing teams to achieve project goals and exceed expectations. Seeking to leverage my technical expertise and leadership to grow your company.

Experience

Principal Engineer & Architect

Fishbowl | September 2022 - Present

- Spearheaded the design and architecture of scalable software solutions, contributing to substantial improvements in system performance and reliability.
- Led cross-functional teams in the development and implementation of strategic projects, ensuring alignment with business objectives and best practices.
- Optimized application performance, achieving a 45% improvement in system efficiency and user satisfaction.

Senior Software Engineer (Contract)

MHVillage | May 2022 - October 2022

- Delivered high-quality software solutions by leveraging advanced programming skills and collaborating effectively with project stakeholders.
- Played a pivotal role in team leadership, mentoring junior engineers, and fostering a culture of continuous improvement and innovation.

Senior Software Engineer

Triskelle Software Solutions | March 2018 - June 2023

- Developed and maintained robust software applications, contributing to the company's reputation for delivering exceptional client value.
- Drove the adoption of WCAG 2.0 AAA compliance, enhancing accessibility and user experience across platforms.

- Created libraries to be used across all our products.

Full Stack Engineer

Freelance | April 2017 - May 2022

- Provided expert software development services to a diverse client base, specializing in custom solutions that address unique business challenges.
